**Re: Notice of Final Action - Title V Permit Renewal
District Facility # N-2253
Project # N-1081498**

Dear Mr. Rios:

The District has issued the Final Renewed Title V Permit for Ball Metal Food Container Corp.. The preliminary decision for this project was made on July 1, 2010. A summary of the comments and the District's response to each comment is included as an attachment to the engineering evaluation.

The public notice for issuance of the Final Renewed Title V Permit will be published approximately three days from the date of this letter.

I would like to thank you and your staff for working with us. We appreciate your concurrence with this action. Should you have any questions, please contact Mr. Jim Swaney, Permit Services Manager, at (559) 230-5900.

Sincerely,

David Warner
Director of Permit Services

**SAN JOAQUIN VALLEY
AIR POLLUTION CONTROL DISTRICT
NOTICE OF FINAL DECISION TO ISSUE
RENEWED FEDERALLY MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the San Joaquin Valley Air Pollution Control District has made its final decision to issue the renewed Federally Mandated Operating Permit to Ball Metal Food Container Corp. for its can manufacturing and sheet coating facility 300 W. Greger Street in Oakdale, California.

The District's analysis of the legal and factual basis for this proposed action, project #N-1081498, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm and the District office at the address below. For additional information regarding this matter, please contact Mr. Jim Swaney, Permit Services Manager, at (559) 230-5900, or contact David Warner, Director of Permit Services, in writing at SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 1990 E. GETTYSBURG AVE, FRESNO, CA 93726-0244.

San Joaquin Valley

HEALTHY AIR LIVING™

Permit to Operate

FACILITY: N-2253

EXPIRATION DATE: 10/31/2015

LEGAL OWNER OR OPERATOR:
MAILING ADDRESS:

BALL METAL FOOD CONTAINER CORP.
P O BOX 589
BROOMFIELD, CO 80038-0589

FACILITY LOCATION:

300 W GREGER ST
OAKDALE, CA 95361-8613

FACILITY DESCRIPTION:

CAN & COIL MANUFACTURING

The Facility's Permit to Operate may include Facility-wide Requirements as well as requirements that apply to specific permit units.

This Permit to Operate remains valid through the permit expiration date listed above, subject to payment of annual permit fees and compliance with permit conditions and all applicable local, state, and federal regulations. This permit is valid only at the location specified above, and becomes void upon any transfer of ownership or location. Any modification of the equipment or operation, as defined in District Rule 2201, will require prior District approval. This permit shall be posted as prescribed in District Rule 2010.

Seyed Sadredin
Executive Director / APCO

David Warner
Director of Permit Services

San Joaquin Valley Air Pollution Control District

FACILITY: N-2253-0-3

EXPIRATION DATE: 10/31/2015

FACILITY-WIDE REQUIREMENTS

1. The owner or operator shall notify the District of any breakdown condition as soon as reasonably possible, but no later than one hour after its detection, unless the owner or operator demonstrates to the District's satisfaction that the longer reporting period was necessary. [District Rule 1100, 6.1; Stanislaus County Rule 110] Federally Enforceable Through Title V Permit
2. The District shall be notified in writing within ten days following the correction of any breakdown condition. The breakdown notification shall include a description of the equipment malfunction or failure, the date and cause of the initial failure, the estimated emissions in excess of those allowed, and the methods utilized to restore normal operations. [District Rule 1100, 7.0; Stanislaus County Rule 110] Federally Enforceable Through Title V Permit
3. The owner or operator of any stationary source operation that emits more than 25 tons per year of nitrogen oxides or reactive organic compounds, shall provide the District annually with a written statement in such form and at such time as the District prescribes, showing actual emissions of nitrogen oxides and reactive organic compounds from that source. [District Rule 1160, 5.0] Federally Enforceable Through Title V Permit
4. Any person building, altering or replacing any operation, article, machine, equipment, or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate, reduce, or control the issuance of air contaminants, shall first obtain an Authority to Construct (ATC) from the District unless exempted by District Rule 2020 (12/20/07). [District Rule 2010, 3.0 and 4.0; and 2020] Federally Enforceable Through Title V Permit
5. The permittee must comply with all conditions of the permit including permit revisions originated by the District. All terms and conditions of a permit that are required pursuant to the Clean Air Act (CAA), including provisions to limit potential to emit, are enforceable by the EPA and Citizens under the CAA. Any permit noncompliance constitutes a violation of the CAA and the District Rules and Regulations, and is grounds for enforcement action, for permit termination, revocation, reopening and reissuance, or modification; or for denial of a permit renewal application. [District Rules 2070, 7.0; 2080; and 2520, 9.9.1 and 9.13.1] Federally Enforceable Through Title V Permit
6. A Permit to Operate or an Authority to Construct shall not be transferred unless a new application is filed with and approved by the District. [District Rule 2031] Federally Enforceable Through Title V Permit
7. Every application for a permit required under Rule 2010 (12/17/92) shall be filed in a manner and form prescribed by the District. [District Rule 2040]
8. The operator shall maintain records of required monitoring that include: 1) the date, place, and time of sampling or measurement; 2) the date(s) analyses were performed; 3) the company or entity that performed the analysis; 4) the analytical techniques or methods used; 5) the results of such analysis; and 6) the operating conditions at the time of sampling or measurement. [District Rule 2520, 9.4.1] Federally Enforceable Through Title V Permit
9. The operator shall retain records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, or report. Support information includes copies of all reports required by the permit and, for continuous monitoring instrumentation, all calibration and maintenance records and all original strip-chart recordings or electronic data. [District Rule 2520, 9.4.2] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate. Any amendments to these Facility-wide Requirements that affect specific Permit Units may constitute modification of those Permit Units.

Facility Name: BALL METAL FOOD CONTAINER CORP.
Location: 300 W GREGER ST, OAKDALE, CA 95361-8613
N-2253-0-3 - Jan 18 2011 9:12AM -- NORMANR

10. The operator shall submit reports of any required monitoring at least every six months unless a different frequency is required by an applicable requirement. All instances of deviations from permit requirements must be clearly identified in such reports. [District Rule 2520, 9.5.1] Federally Enforceable Through Title V Permit
11. Deviations from permit conditions must be promptly reported, including deviations attributable to upset conditions, as defined in the permit. For the purpose of this condition, promptly means as soon as reasonably possible, but no later than 10 days after detection. The report shall include the probable cause of such deviations, and any corrective actions or preventive measures taken. All required reports must be certified by a responsible official consistent with section 10.0 of District Rule 2520 (6/21/01). [District Rules 2520, 9.5.2 and 1100, 7.0] Federally Enforceable Through Title V Permit
12. If for any reason a permit requirement or condition is being challenged for its constitutionality or validity by a court of competent jurisdiction, the outcome of such challenge shall not affect or invalidate the remainder of the conditions or requirements in that permit. [District Rule 2520, 9.7] Federally Enforceable Through Title V Permit
13. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit. [District Rule 2520, 9.8.2] Federally Enforceable Through Title V Permit
14. The permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition. [District Rule 2520, 9.8.3] Federally Enforceable Through Title V Permit
15. The permit does not convey any property rights of any sort, or any exclusive privilege. [District Rule 2520, 9.8.4] Federally Enforceable Through Title V Permit
16. The Permittee shall furnish to the District, within a reasonable time, any information that the District may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the District copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to EPA along with a claim of confidentiality. [District Rule 2520, 9.8.5] Federally Enforceable Through Title V Permit
17. The permittee shall pay annual permit fees and other applicable fees as prescribed in Regulation III of the District Rules and Regulations. [District Rule 2520, 9.9] Federally Enforceable Through Title V Permit
18. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to enter the permittee's premises where a permitted source is located or emissions related activity is conducted, or where records must be kept under condition of the permit. [District Rule 2520, 9.13.2.1] Federally Enforceable Through Title V Permit
19. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit. [District Rule 2520, 9.13.2.2] Federally Enforceable Through Title V Permit
20. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to inspect at reasonable times any facilities, equipment, practices, or operations regulated or required under the permit. [District Rule 2520, 9.13.2.3] Federally Enforceable Through Title V Permit
21. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or applicable requirements. [District Rule 2520, 9.13.2.4] Federally Enforceable Through Title V Permit
22. No air contaminants shall be discharged into the atmosphere for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker than Ringelmann #1 or equivalent to 20% opacity and greater, unless specifically exempted by District Rule 4101 (2/17/05). If the equipment or operation is subject to a more stringent visible emission standard as prescribed in a permit condition, the more stringent visible emission limit shall supersede this condition. [District Rule 4101] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

23. No person shall manufacture, blend, or repackage for use within the District; or supply, sell, or offer for sale within the District; or solicit for application or apply within the District any architectural coating with a VOC content in excess of the corresponding limit specified in the Table of Standards 1 of District Rule 4601 (12/17/09) or the Table of Standards 2 of District Rule 4601, after the specified effective date in the Table of Standards 1 or the Table of Standards 2. [District Rule 4601, 5.1] Federally Enforceable Through Title V Permit
24. All VOC-containing materials subject to Rule 4601 (12/17/09) shall be stored in closed containers when not in use. [District Rule 4601, 5.4] Federally Enforceable Through Title V Permit
25. The permittee shall comply with all the Labeling and Test Methods requirements outlined in Rule 4601 sections 6.1 and 6.3 (12/17/09). [District Rule 4601, 6.1 and 6.3] Federally Enforceable Through Title V Permit
26. With each report or document submitted under a permit requirement or a request for information by the District or EPA, the permittee shall include a certification of truth, accuracy, and completeness by a responsible official. [District Rule 2520, 9.13.1 and 10.0] Federally Enforceable Through Title V Permit
27. If the permittee performs maintenance on, or services, repairs, or disposes of appliances, the permittee shall comply with the standards for Recycling and Emissions Reduction pursuant to 40 CFR Part 82, Subpart F. [40 CFR 82 Subpart F] Federally Enforceable Through Title V Permit
28. If the permittee performs service on motor vehicles when this service involves the ozone-depleting refrigerant in the motor vehicle air conditioner (MVAC), the permittee shall comply with the standards for Servicing of Motor Vehicle Air Conditioners pursuant to all the applicable requirements as specified in 40 CFR Part 82, Subpart B. [40 CFR Part 82, Subpart B] Federally Enforceable Through Title V Permit
29. Disturbances of soil related to any construction, demolition, excavation, extraction, or other earthmoving activities shall comply with the requirements for fugitive dust control in District Rule 8021 unless specifically exempted under Section 4.0 of Rule 8021 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8021 and 8011] Federally Enforceable Through Title V Permit
30. Unless specifically exempted under Section 4.0 of Rule 8031 (8/19/04) or Rule 8011 (8/19/04), no person shall perform any outdoor handling, storage, and transport of bulk materials unless the appropriate requirements in Table 8031-1 of Rule 8031 are sufficiently implemented to limit Visible Dust Emissions (VDE) to 20% opacity or to comply with the conditions for a stabilized surface as defined in Rule 8011. [District Rules 8031 and 8011] Federally Enforceable Through Title V Permit
31. An owner/operator shall prevent or cleanup any carryout or trackout in accordance with the requirements of District Rule 8041 Section 5.0, unless specifically exempted under Section 4.0 of Rule 8041 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8041 and 8011] Federally Enforceable Through Title V Permit
32. Whenever open areas are disturbed, or vehicles are used in open areas, the facility shall comply with the requirements of Section 5.0 of District Rule 8051, unless specifically exempted under Section 4.0 of Rule 8051 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8051 and 8011] Federally Enforceable Through Title V Permit
33. Any paved road or unpaved road shall comply with the requirements of District Rule 8061 unless specifically exempted under Section 4.0 of Rule 8061 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8061 and Rule 8011] Federally Enforceable Through Title V Permit
34. Any unpaved vehicle/equipment area that anticipates more than 50 Average annual daily Trips (AADT) shall comply with the requirements of Section 5.1.1 of District Rule 8071. Any unpaved vehicle/equipment area that anticipates more than 150 vehicle trips per day (VDT) shall comply with the requirements of Section 5.1.2 of District Rule 8071. On each day that 25 or more VDT with 3 or more axes will occur on an unpaved vehicle/equipment traffic area, the owner/operator shall comply with the requirements of Section 5.1.3 of District Rule 8071. On each day when a special event will result in 1,000 or more vehicles that will travel/park on an unpaved area, the owner/operator shall comply with the requirements of Section 5.1.4 of District Rule 8071. All sources shall comply with the requirements of Section 5.0 of District Rule 8071 unless specifically exempted under Section 4.0 of Rule 8071 (9/16/2004) or Rule 8011 (8/19/2004). [District Rule 8071 and Rule 8011] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

35. On each day that 50 or more vehicle daily trips, or 25 or more vehicle daily trips with 3 or more axles, originates from within and remains exclusively within an unpaved vehicle/equipment traffic area, the owner/operator may apply/reapply water to limit VDE to 20% opacity. The owner/operator shall restrict access and periodically stabilize a disturbed surface area whenever a site becomes inactive to comply with the conditions for a stabilized surface as defined in Rule 8011, unless specifically exempted under Section 4.0 of Rule 8071 (9/16/04) or Rule 8011 (8/19/04). [District Rules 8071 and Rule 8011] Federally Enforceable Through Title V Permit
36. Any owner or operator of a demolition or renovation activity, as defined in 40 CFR 61.141, shall comply with the applicable inspection, notification, removal, and disposal procedures for asbestos containing materials as specified in 40 CFR 61.145 (Standard for Demolition and Renovation). [40 CFR 61 Subpart M] Federally Enforceable Through Title V Permit
37. The permittee shall submit certifications of compliance with the terms and standards contained in Title V permits, including emission limits, standards and work practices, to the District and the EPA annually (or more frequently as specified in an applicable requirement or as specified by the District). The certification shall include the identification of each permit term or condition, the compliance status, whether compliance was continuous or intermittent, the methods used for determining the compliance status, and any other facts required by the District to determine the compliance status of the source. [District Rule 2520, 9.16] Federally Enforceable Through Title V Permit
38. The permittee shall submit an application for Title V permit renewal to the District at least six months, but not greater than 18 months, prior to the permit expiration date. [District Rule 2520, 5.2] Federally Enforceable Through Title V Permit
39. When a term is not defined in a Title V permit condition, the definition in the rule cited as the origin and authority for the condition in a Title V permits shall apply. [District Rule 2520, 9.1.1] Federally Enforceable Through Title V Permit
40. Compliance with permit conditions in the Title V permit shall be deemed in compliance with the following outdated SIP requirements: Rule 110 (Stanislaus). A permit shield is granted from these requirements. [District Rule 2520, 13.2] Federally Enforceable Through Title V Permit
41. Compliance with permit conditions in the Title V permit shall be deemed in compliance with the following applicable requirements: SJVUAPCD Rules 1100, sections 6.1 and 7.0 (12/17/92); 2010, sections 3.0 and 4.0 (12/17/92); 2031 (12/17/92); 2070, section 7.0 (12/17/92); 2080 (12/17/92); 4101 (2/17/05); 4601, sections 5.1, 5.2, 5.3, and 5.8 (12/17/09); 8021 (8/19/04); 8031 (8/19/04); 8041 (8/19/04); 8051 (8/19/04); 8061 (8/19/04); and 8071 (9/16/04). A permit shield is granted from these requirements. [District Rule 2520, 13.2] Federally Enforceable Through Title V Permit
42. When applicable to 40 CFR Part 68, a subject facility shall submit to the proper authority a Risk Management Plan when mandated by the regulation. [40 CFR Part 68] Federally Enforceable Through Title V Permit
43. Any person that operates a VOC emission control system subject to the provisions of Section 5.2 of District Rule 4604 (9/20/07) shall submit to the APCO for approval an Operation and Maintenance (O/M) plan. The O/M Plan shall specify actions to be taken to satisfy the requirements of District Rule 4604, Section 5.2 and shall include the following: values or range of acceptable values for key system operating parameter(s); procedures for preventive and corrective maintenance performed; procedures for collecting and recording required data and other information in a form approved by the APCO; burner maintenance schedule; catalyst maintenance and maintenance schedule, if applicable; duct inspection schedule; procedures for revising the O/M Plan; and other information necessary to verify compliance with applicable provisions of Rule 4604. The O/M Plan shall be updated prior to any planned change in operation of the VOC emission control system. [District Rule 4604, 5.2.7 and 6.5] Federally Enforceable Through Title V Permit
44. Stationary source (as defined in 40 CFR 63.2 - Definitions) emissions shall be less than 10 tons per year of each single hazardous air pollutant (HAP) (as defined in 40 CFR 63.2 - Definitions) and less than 25 tons per year for any combination of HAPs. A year, for this condition, is any consecutive 12 month period based on a monthly rolling total. [District NSR Rule] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

45. The owner/operator shall calculate and maintain records on a monthly basis of the quantity of each HAP emitted into the atmosphere from all sources at the facility. The HAP emissions shall be totaled for a rolling consecutive 12-month period. The records shall include an analysis (or other information) sufficiently detailed to allow the District Personal to make a finding about the source's applicability status with regard to the relevant standard or other requirement. [District NSR Rule and District Rule 2520 9.3.2] Federally Enforceable Through Title V Permit
46. The Permittee shall submit a semi annual summary report of HAP emissions report District. This report shall submitted along with semi-annual monitoring report. The report shall contain the following: (i). the monthly individual HAP and total HAP emissions for the previous 17 months and (ii). the totals for the six 12-consecutive month periods of individual HAP and total HAP emissions (i.e., one for each of the months of the reporting period). [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
47. The reporting periods for the Report of Required Monitoring and the Compliance Certification Report are based upon December 1 of each year, unless alternative dates are approved by the District Compliance Division. These reports are due within 30 days of the end of the reporting period. [District Rule 2520, 9.5] Federally Enforceable Through Title V Permit
48. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-1-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #1) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.6 MMBTU/HR FLYNN AERO FLAME AF-9 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED 8.0 MMBTU/HR SMITH THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-2-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #2) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.6 MMBTU/HR FLYNN AERO FLAME AF-9 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-4-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #4) SERVED BY ONE ABM 420 BODYMAKER AND ONE 0.6 MMBTU/HR FLYNN AERO FLAME AF-9 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-7-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #7) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.4 MMBTU/HR SARDEE SLIX-3 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-9-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #9) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.4 MMBTU/HR SARDEE SLIX-3 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-15-8

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SHEET COATING OPERATION #2 CONSISTING OF A WAGNER MODEL 15X44-A SHEET COATER AND A SHARED 8.6 MMBTU/HR YOUNG BROS. KELGRAF OVEN WITH MAXON CYCLOMAX LOW NOX BURNERS. THE COATING APPLICATION EQUIPMENT AND THE OVEN ARE ALL VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District NSR Rule] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the coating application operation and the curing oven shall be vented to the thermal oxidizer prior to discharge into the atmosphere at all times. [District NSR Rule] Federally Enforceable Through Title V Permit
4. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC capture and control. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.4 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be equipped with an operational continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.4 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
6. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding 25 g/l (0.21 lb/gal) unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07). [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
7. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
8. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
9. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
10. The VOC emissions due to coating and solvent use shall not exceed 36.7 pounds during any one day. [District NSR Rule and 40 CFR Part 64] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

11. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 10,366 pounds during the first calendar quarter, 9,941 pounds during the second calendar quarter, 10,187 pounds during the third calendar quarter and 10,027 pounds during the fourth calendar quarter. The first and fourth calendar quarter VOC emissions may be increased by the amount of second and third calendar quarter VOC's not emitted. [District Rule 2201] Federally Enforceable Through Title V Permit
12. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 40,521 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
13. The NOx emission concentration from the curing oven shall not exceed 0.024 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
14. The CO emission concentration from the curing oven shall not exceed 0.15 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
15. The VOC emission concentration from the curing oven, due to the the burning of natural gas, shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
16. The SOx emission concentration from the curing oven shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]
17. The PM10 emission concentration from the curing oven shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
18. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
19. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
20. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]
22. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
24. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

25. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rules 1081, 2520, 9.3.2, 4604, 5.2.8.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
26. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
27. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions using non-compliant coating and under conditions specified in the Permit-To-Operate. [District Rule 4604, 5.2.8.2 and 5.2.8.3] Federally Enforceable Through Title V Permit
28. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
29. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
30. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit
31. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f) The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
32. Records of the combined quarterly VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept. The records shall be updated at least weekly. [District Rules 1070 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
33. Records of the combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept for consecutive 12-month period. [District NSR Rule] Federally Enforceable Through Title V Permit
34. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-16-8

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SHEET COATING OPERATION #3 CONSISTING OF A WAGNER MODEL 15X44-A SHEET COATER AND A SHARED 8.6 MMBTU/HR YOUNG BROS. KELGRAF OVEN WITH MAXON CYCLOMAX LOW NOX BURNERS. THE COATING APPLICATION EQUIPMENT AND THE OVEN ARE ALL VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District NSR Rule] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the coating application operation and the curing oven shall be vented to the thermal oxidizer prior to discharge into the atmosphere at all times. [District NSR Rule] Federally Enforceable Through Title V Permit
4. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC capture and control. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.4 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be equipped with an operational continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.4 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
6. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding 25 g/l (0.21 lb/gal) unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07). [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
7. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
8. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
9. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
10. The VOC emissions due to coating and solvent use shall not exceed 36.7 pounds during any one day. [District NSR Rule and 40 CFR Part 64] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

11. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 10,366 pounds during the first calendar quarter, 9,941 pounds during the second calendar quarter, 10,187 pounds during the third calendar quarter and 10,027 pounds during the fourth calendar quarter. The first and fourth calendar quarter VOC emissions may be increased by the amount of second and third calendar quarter VOC's not emitted. [District Rule 2201] Federally Enforceable Through Title V Permit
12. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 40,521 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
13. The NO_x emission concentration from the curing oven shall not exceed 0.024 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
14. The CO emission concentration from the curing oven shall not exceed 0.15 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
15. The VOC emission concentration from the curing oven, due to the the burning of natural gas, shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
16. The SO_x emission concentration from the curing oven shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]
17. The PM₁₀ emission concentration from the curing oven shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
18. The NO_x emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
19. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
20. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The SO_x emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]
22. The PM₁₀ emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
24. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

25. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rules 1081, 2520, 9.3.2, 4604, 5.2.8.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
26. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
27. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions using non-compliant coating and under conditions specified in the Permit-To-Operate. [District Rule 4604, 5.2.8.2 and 5.2.8.3] Federally Enforceable Through Title V Permit
28. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
29. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
30. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit
31. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
32. Records of the combined quarterly VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept. The records shall be updated at least weekly. [District Rules 1070 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
33. Records of the combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept for consecutive 12-month period. [District NSR Rule] Federally Enforceable Through Title V Permit
34. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

29. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
30. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit
31. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f) The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
32. Records of the combined quarterly VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept. The records shall be updated at least weekly. [District Rules 1070 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
33. Records of the combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept for consecutive 12-month period. [District NSR Rule] Federally Enforceable Through Title V Permit
34. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-18-8

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

UV TYPE SHEET COATING OPERATION #1 CONSISTING OF A CRABTREE MODEL 13X45-F1 SHEET COATER. THE SHARED OVEN FROM PERMIT UNITS N-2253-15, N-2253-16, AND N-2253-17 MAY SERVE THE PRODUCTS MANUFACTURED FROM THIS PERMIT UNIT

PERMIT UNIT REQUIREMENTS

1. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District NSR Rule] Federally Enforceable Through Title V Permit
2. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding 25 g/l (0.21 lb/gal) unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07). [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
3. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
4. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
5. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
6. The VOC emissions due to coating and solvent use shall not exceed 0.2 pounds during any one day. [District NSR Rule] Federally Enforceable Through Title V Permit
7. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 10,366 pounds during the first calendar quarter, 9,941 pounds during the second calendar quarter, 10,187 pounds during the third calendar quarter, and 10,027 pounds during the fourth calendar quarter. The first and fourth calendar quarter VOC emissions may be increased by the amount of second and third calendar quarter VOC's not emitted. [District Rule 2201] Federally Enforceable Through Title V Permit
8. The combined VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18, shall not exceed 40,521 pounds for any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

9. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
10. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
11. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2]] Federally Enforceable Through Title V Permit
12. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit
13. Records of the combined quarterly VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept. The records shall be updated at least weekly. [District Rules 1070 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
14. Records of the combined annual VOC emissions from the equipment operating under permits N-2253-15, N-2253-16, N-2253-17, and N-2253-18 (including the VOC's due to combustion), shall be kept. The records shall be updated at least weekly. [District NSR Rule] Federally Enforceable Through Title V Permit
15. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2 and 6.3] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-19-4

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

COATING STORAGE TANK #1 CONSISTING OF ONE 8,000 GALLON ABOVEGROUND VERTICAL FIXED ROOF STORAGE TANK

PERMIT UNIT REQUIREMENTS

1. The maximum amount of coatings received into the storage tank shall not exceed 8,000 gallons in any one day and 416,000 gallons in any one calendar year. [District NSR Rule] Federally Enforceable Through Title V Permit
2. The VOC emission rate from the receiving and storage of the coatings shall not exceed 0.6 lb VOC/day and 27 lb VOC/year. [District NSR Rule] Federally Enforceable Through Title V Permit
3. Organic liquids that are received, stored, or held in this tank shall have a true vapor pressure (TVP) less than 0.5 psia under all storage conditions. [District Rule 4623, 4.4] Federally Enforceable Through Title V Permit
4. Permittee shall conduct true vapor pressure (TVP) testing of the organic liquid stored in this tank at least once every 24 months during the summer (July - September), and/or whenever there is a change in the source or type of organic liquid stored in this tank. In lieu of testing each tank, the permittee may conduct TVP testing of a representative tank provided the requirements of District Rule 4623 (amended 5/19/05), Section 6.2 are satisfied. TVP testing shall not be required for tanks that exclusively store organic liquids listed in Appendix A of District Rule 4623, provided the storage temperature indicated in Appendix A is not exceeded at any time. [District Rule 4623, 6.2.2] Federally Enforceable Through Title V Permit
5. The TVP testing shall be conducted at actual storage temperature of the organic liquid in the tank. [District Rule 4623, 6.2.2] Federally Enforceable Through Title V Permit
6. The TVP of any organic liquid, except for crude oil, shall be determined by measuring the Reid Vapor Pressure (RVP) using ASTM D 323 (Test Method for Vapor Pressure for Petroleum Products), and converting the RVP to TVP at the tank's maximum organic liquid storage temperature. The conversion of RVP to TVP shall be done in accordance with the procedures in Appendix B. Appendix B is an excerpt from the oil and gas section of "ARB Technical Guidance Document to the Criteria and Guidelines Regulation for AB 2588", dated August 1989. [District Rule 4623, 6.4.3] Federally Enforceable Through Title V Permit
7. Permittee shall submit the records of TVP and API gravity testing to the APCO within 45 days after the date of testing. The records shall include the tank identification number, Permit to Operate number, type of stored organic liquid, TVP and API gravity of the organic liquid, test methods used, and a copy of the test results. [District Rule 4623, 6.3.6] Federally Enforceable Through Title V Permit
8. The operator shall maintain records that indicate the true vapor pressure (TVP) of the coatings stored, the daily quantity of coatings received into the tank, and the cumulative annual quantity of coatings received into the storage tank. [District NSR Rule, District Rules 2520, 9.3.2 and 4623, 6.3] Federally Enforceable Through Title V Permit
9. The operator shall keep an accurate record of each organic liquid stored in each tank, including its storage temperature, TVP, and API gravity. [District Rules 2520, 9.3.2 and 4623, 6.3.1] Federally Enforceable Through Title V Permit
10. All records shall be retained for a minimum of 5 years, and shall be made available for District inspection upon request. [District Rules 1070, 2520, 9.4.2 and 4623, 6.3] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

7. Permittee shall submit the records of TVP and API gravity testing to the APCO within 45 days after the date of testing. The records shall include the tank identification number, Permit to Operate number, type of stored organic liquid, TVP and API gravity of the organic liquid, test methods used, and a copy of the test results. [District Rule 4623, 6.3.6] Federally Enforceable Through Title V Permit
8. The operator shall maintain records that indicate the true vapor pressure (TVP) of the coatings stored, the daily quantity of coatings received into the tank, and the cumulative annual quantity of coatings received into the storage tank. [District NSR Rule, District Rules 2520, 9.3.2 and 4623, 6.3] Federally Enforceable Through Title V Permit
9. The operator shall keep an accurate record of each organic liquid stored in each tank, including its storage temperature, TVP, and API gravity. [District Rules 2520, 9.3.2 and 4623, 6.3.1] Federally Enforceable Through Title V Permit
10. All records shall be retained for a minimum of 5 years, and shall be made available for District inspection upon request. [District Rules 1070, 2520, 9.4.2 and 4623, 6.3] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-21-3

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #10) SERVED BY ONE SOUDRONIC MODEL AFB 1075 BODYMAKER AND ONE 0.6 MMBTU/HR SOUDRONIC MODEL LSC-12 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL ARE SERVED BY THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM₁₀ emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21, shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21, shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NO_x emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SO_x emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-22-1

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #5) SERVED BY ONE SOUDRONIC MODEL AFB-860 BODYMAKER AND ONE 0.4 MMBTU/HR SOUDRONIC MODEL USC-15 CURING TUNNEL. A FUME HOOD OVER THE COATING APPLICATOR, CONVEYOR, AND CURING TUNNEL ARE VENTED TO THE SHARED 8.0 MMBTU/HR SMITH THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all time except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall be less than 100 pounds per any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall be less than 0.2 pounds per any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District Rule 2201] Federally Enforceable Through Title V Permit
21. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District Rule 2201] Federally Enforceable Through Title V Permit
22. The CO emission concentration from the thermal oxidizer shall not exceed 0.084 lb/MMBtu of natural gas consumption. [District Rule 2201] Federally Enforceable Through Title V Permit
23. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District Rule 2201] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

24. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
25. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
26. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
27. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
28. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
29. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
30. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
31. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
32. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
33. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit
34. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f) The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2201, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
37. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rules 2201 and 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

TITLE V PERMIT RENEWAL EVALUATION
Can Manufacturing and Sheet Coating Operations

Engineer: Ramon Norman
Date: January 6, 2011

Facility Number: N-2253
Facility Name: Ball Metal Food Container Corp., LLC
Mailing Address: 9300 West 108th Circle
Broomfield, CO 80021-3682

Contact Name: Bob Hall
Phone: (303) 460-5445

Responsible Official: Michael W. Feldser
Title: President, Food & Household Products Packaging Division

Project # : N-1081498
Deemed Complete: May 13, 2008

I. PROPOSAL

Ball Metal Food Container Corp. was issued a Title V permit on November 30, 2003. As required by District Rule 2520, the applicant is requesting a permit renewal. The existing Title V permit shall be reviewed and modified to reflect all applicable District and federal rules updated, removed, or added since the issuance of the initial Title V permit.

The purpose of this evaluation is to provide the legal and factual basis for all updated applicable requirements and to determine if the facility will comply with these updated requirements. It also specifically identifies all additions, deletions, and/or changes made to permit conditions or equipment descriptions.

II. FACILITY LOCATION

Ball Metal Food Container Corp. is located at 300 W. Greger Street in Oakdale, CA.

III. EQUIPMENT LISTING

A detailed facility printout listing all permitted equipment at the facility is included as Attachment E.

IV. GENERAL PERMIT TEMPLATE USAGE

The applicant is requesting to use the following model general permit Templates:

A. Template SJV-UM-0-1 Facility Wide Umbrella

The applicant has requested to utilize template No. SJV-UM-0-2, Facility Wide Umbrella. Based on the information submitted in the Template Qualification Form, the applicant qualifies for the use of this template.

V. SCOPE OF EPA AND PUBLIC REVIEW

Certain segments of the proposed Renewed Operating Permit are based on model general permit templates that have been previously subject to EPA and public review. The terms and conditions from the model general permit templates are included in the proposed permit and are not subject to further EPA and public review.

For permit applications utilizing model general permit templates, public and agency comments on the District's proposed actions are limited to the applicant's eligibility for model general permit template, applicable requirements not covered by the model general permit template, and the applicable procedural requirements for issuance of Title V Operating Permits.

The following permit conditions, including their underlying applicable requirements, originate from model general permit templates and are not subject to further EPA or public review.

Conditions 1 through 21, 23 through 26, and 37 through 41 of the facility-wide requirements N-2253-0-3.

VI. FEDERALLY ENFORCEABLE REQUIREMENTS

A. Rules Updated

- District Rule 2020, Exemptions
(amended March 21, 2002 ⇒ amended December 19, 2002 ⇒ amended December 20, 2007)
- District Rule 2201, New and Modified Stationary Source Review Rule
(amended December 19, 2002 ⇒ amended September 21, 2006 ⇒ amended December 18, 2008 and effective on June 10, 2010)
- District Rule 4101, Visible Emissions
(amended November 15, 2001 ⇒ amended February 17, 2005)
- District Rule 4601, Architectural Coatings
(amended October 31, 2001 ⇒ amended December 17, 2009)
- District Rule 4604, Can And Coil Coating Operations
(amended December 20, 2001 ⇒ amended September 20, 2007)
- District Rule 4623, Storage of Organic Liquids
(amended December 17, 1992 ⇒ amended May 19, 2005)
- District Rule 8011, General Requirements
(adopted November 15, 2001 ⇒ amended August 19, 2004)
- District Rule 8021, Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities
(adopted November 15, 2001 ⇒ amended August 19, 2004)
- District Rule 8031, Bulk Materials
(adopted November 15, 2001 ⇒ amended August 19, 2004)
- District Rule 8041, Carryout and Trackout
(adopted November 15, 2001 ⇒ amended August 19, 2004)
- District Rule 8051, Open Areas (adopted November 15, 2001)
(adopted November 15, 2001 ⇒ amended August 19, 2004)
- District Rule 8061, Paved and Unpaved Roads
(adopted November 15, 2001 ⇒ amended August 19, 2004)

- District Rule 8071, Unpaved Vehicle/Equipment Traffic Areas (adopted November 15, 2001 ⇒ amended September 16, 2004)
- 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos
- 40 CFR Part 82, Subpart F, Stratospheric Ozone

B. Rules Not Updated

- District Rule 1081, Source Sampling (amended December 16, 1993)
- District Rule 1100, Equipment Breakdown (amended December 17, 1992)
- District Rule 1160, Emission Statements (adopted November 18, 1992)
- District Rule 2010, Permits Required (amended December 17, 1992)
- District Rule 2031, Transfer of Permits (amended December 17, 1992)
- District Rule 2070, Standards for Granting Applications (amended December 17, 1992)
- District Rule 2080, Conditional Approval (amended December 17, 1992)
- District Rule 2520, Federally Mandated Operating Permits (amended June 21, 2001)
- District Rule 4201, Particulate Matter Concentration (amended December 17, 1992)
- District Rule 4202, Particulate Matter - Emission Rate (amended December 17, 1992)
- District Rule 4801, Sulfur Compounds (amended December 17, 1992) (Non-SIP replacement for Stanislaus County Rule 407)
- 40 CFR Part 60, Subpart K, Standards of Performance for Storage Vessels for Petroleum Liquids Constructed, Reconstructed, or Modified after June 11, 1973 and prior to May 19, 1978
- 40 CFR Part 64, Compliance Assurance Monitoring (CAM)

- 40 CFR Part 68, Chemical Action Prevention Provisions

VII. REQUIREMENTS NOT FEDERALLY ENFORCEABLE

For each Title V source, the District issues a single permit that contains the Federally Enforceable requirements, as well as the District-only requirements. The District-only requirements are not a part of the Title V Operating Permits. The terms and conditions that are part of the facility's Title V permit are designated as "Federally Enforceable Through Title V Permit".

For this facility, the following are not federally enforceable and will not be discussed in further detail:

A. Rules Added

None

B. Rules Not Updated

District Rule 2040, Applications

(amended December 17, 1992 ⇒ removed from SIP December 16, 2004)

Condition 7 of the facility-wide requirements N-2253-0-3 is based on the rule listed above and is not Federally Enforceable through Title V

District Rule 4102, Nuisance (as amended December 17, 1992)

Condition 48 of the facility-wide requirements N-2253-0-3 is based on the rule listed above and is Federally Enforceable through Title V

VIII. PERMIT REQUIREMENTS

The purpose of this evaluation is to review changes to federally enforceable requirements; therefore, this compliance section will only address rules that have been amended or added since the issuance of the initial Title V permit.

A. District Rule 2020 - Exemptions

District Rule 2020 lists equipment which is specifically exempt from obtaining permits and specifies recordkeeping requirements to verify such exemptions.

The amendments to this rule do not have any affect on current permit requirements and will therefore not be addressed in this evaluation.

B. District Rule 2201 - New and Modified Stationary Source Review Rule

District Rule 2201 has been amended since this facility's initial Title V permit was issued. This Title V permit renewal does not constitute a modification per section 3.26, defined as an action including at least one of the following items:

- 1) Any change in hours of operation, production rate, or method of operation of an existing emissions unit, which would necessitate a change in permit conditions.
- 2) Any structural change or addition to an existing emissions unit which would necessitate a change in permit conditions. Routine replacement shall not be considered to be a structural change.
- 3) An increase in emissions from an emissions unit caused by a modification of the Stationary Source when the emissions unit is not subject to a daily emissions limitation.
- 4) Addition of any new emissions unit which is subject to District permitting requirements.
- 5) A change in a permit term or condition proposed by an applicant to obtain an exemption from an applicable requirement to which the source would otherwise be subject.

Therefore, the updated requirements of this rule are not applicable at this time.

Authority to Construct (ATC) #N-2253-22-0 was subject to the NSR Rule at the time the applicant applied for the Authority to Construct (ATC). The following conditions from ATC #N-2253-22-0, issued by SJVAPCD on 03/24/2008, will be used to define how NSR permit terms should be incorporated into the Title V permit.

- a. N-2253-22-1: Side Seam Stripe Spray Operation (Line #5) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared 8.0 MMBtu/hr Thermal Oxidizer
 - Condition 1 from the ATC, the prohibition of causing a public nuisance, is not federally enforceable and was not included in the requirements for this permit unit because it is included in the draft facility-wide requirements N-2253-0-3 as condition 48.
 - Condition 2 from the ATC, which limits visible emissions to 20% opacity or less, was not included in the requirements for this permit

unit because it is included in the draft facility-wide requirements N-2253-0-3 as condition 22.

- Conditions 3 through 10 from the ATC were included as conditions 1 through 8 of the requirements for this permit unit.
- Conditions 11 through 12 from the ATC were included as conditions 9 through 10 of the requirements for this permit unit. The maximum VOC content of solvents for most cleaning activities were reduced from the ATC limit of 50 g/l (0.42 lb/gallon) to 25 g/l (0.21 lb/gallon) to satisfy the requirements of the latest amendments to District Rule 4604 (9/20/2007) and the District's Extreme Ozone Attainment Demonstration Plan (10/8/2004).
- Conditions 13 through 15 from the ATC were included as conditions 11 through 13 of the requirements for this permit unit.
- The requirements of condition 16 from the ATC were included as conditions 14 through 15 of the requirements for this permit unit.
- Conditions 17 through 25 from the ATC were included as conditions 16 through 25 of the requirements for this permit unit.
- The requirements of condition 26 from the ATC were included as conditions 26 through 27 of the requirements for this permit unit.
- The requirements of conditions 27 through 28 from the ATC were included as conditions 28 through 29 of the requirements for this permit unit.
- Condition 30 of the requirements for this permit unit was added. This condition requires that source testing be performed under conditions representative of normal operating conditions.
- Conditions 29 through 36 from the ATC were included as conditions 31 through 37 of the requirements for this permit unit.
- Conditions 37 through 38 from the ATC, which limit annual emissions of Hazardous Air Pollutants (HAP) to below the HAP Major Source threshold and require the facility to keep monthly records of HAP emissions, was not included in the requirements for this permit unit because they are included in the draft facility-wide requirements N-2253-0-3 as conditions 44 through 45.
- Condition 39 from the ATC is procedural requirement that has been satisfied through inclusion of the permit in this Title V renewal and therefore will not be added to requirements for this permit unit.

C. District Rule 2520 - Federally Mandated Operating Permits

The purposes of this rule include: providing an administrative mechanism for issuing, renewing, revising, and revoking operating permits sources of air contaminants in accordance with requirements of 40 CFR Part 70 and

providing an administrative mechanism for incorporating New and modified Source Review (NSR) requirements into a Part 70 permit.

There are no federally applicable Greenhouse Gas (GHG) requirements for this source. It should be noted that the Mandatory Greenhouse Gas Reporting rule (40 CFR Part 98) is not included in the definition of an applicable requirement within Title V (per 40 CFR 71.2). Therefore, there will be no further discussion of GHG in this evaluation.

Rule 2520, Section 6.4.4, "Other Changes Not Requiring Title V Permit Amendment," allowed the permittee to implement changes, including the addition of new emissions units, without triggering the permit modification or amendment requirements until the time of Title V permit renewal, provided the conditions described in Sections 6.4.4.1 through 6.4.4.2 were met.

- a. N-2253-22-1: Side Seam Stripe Spray Operation (Line #5) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared 8.0 MMBtu/hr Thermal Oxidizer

As discussed above, the requirements from ATC #N-2253-22-0 for this new permit unit are being incorporated into the Title V permit through this renewal. Conditions 6, 24 through 25, and 33 through 36 ensure compliance with the monitoring, recordkeeping, and recording requirements of this rule.

D. District Rule 4101 - Visible Emissions

District Rule 4101 was last amended on February 17, 2005 and EPA approved inclusion of this version of the Rule into the SIP on August 11, 2005.

Section 5.0 prohibits the discharge of any air contaminant for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker in shade as that designated as No. 1 on the Ringelmann Chart; or is of such opacity as to obscure an observer's view to a degree equal to or greater than the smoke described in Section 5.1 of Rule 4101. Condition 22 of the facility-wide requirements N-2253-0-3 ensures compliance.

E. District Rule 4601 Architectural Coatings

The purpose of this rule is to limit VOC emissions from architectural coatings. This rule is applicable to any person who supplies, sells, offers for sale, applies, or solicits the application of any architectural coating, or who manufactures, blends or repackages any architectural coating. It requires

limiting the application of any architectural coating to no more than what is listed in the Table of Standards (Section 5.0). The rule was amended in December 17, 2009 but has not yet been approved for inclusion in the SIP. The amendments to the rule lowered the VOC content of the coatings applied to stationary structures, portable buildings, pavements, or curbs. A brief summary of the rule amendments is given below.

Section 2.0 – Applicability

The phrase “blends or repackages” was added to rule language to extend the applicability of rule language to facilities involved in those activities.

Section 3.0 – Definitions

Numerous definitions was added, deleted or modified in order to make the amended rule harmonize with definitions and rule requirements presented in the California Air Resources Board (ARB) Suggested Control Measures (SCM).

Section 4.0 – Exemptions

A reporting requirement was added for any architectural coating that is sold in a container with a volume of one liter or less. The exemption for architectural coatings was further defined by adding “coatings that are supplied and offered for sale” to current language, in order to make the rule consistent with the ARB SCM.

Section 5.0 – Requirements

The amended rule implements the recommended VOC limits per the ARB SCM. The following changes were as follows: 15 coating categories were eliminated, ten were added, nineteen coatings categories remained unchanged, and the VOC content limits for 19 categories were lowered.

Section 6.0 – Administrative Requirements

Section 6.1 – Labeling Requirements

Labeling requirements were updated to add new labeling standards consistent with new coatings categories per the SCM.

Section 6.2 – Reporting Requirements

A new section was added to include reporting requirements per the SCM. The SCM contains a new requirement to submit sales data. Collection of this data is authorized in the California Health and Safety Code which requires submission of data to estimate emissions.

Section 6.3 – Test Methods

New sections were added to coincide with new coating categories pursuant to the ARB SCM.

Section 7.0 – Compliance Schedule

This section was updated to account for the new amendments to rule language by adding the phrase “the dates specified within the text of the rule.”

Section 8.0 – Averaging Compliance Option

This section was deleted in its entirety.

Since latest rule amendment did not result in any new requirements or any revisions to the current requirements in the facility-wide permit, no further evaluation is needed.

a. N-2253-0-3: Facility-Wide Requirements

- Conditions 23 through 25 of the facility-wide requirements N-2253-0-3 ensure compliance with this rule.

F. District Rule 4604 - Can And Coil Coating Operations

The purpose of this rule is to limit the emissions of volatile organic compounds (VOCs) from can and coil coating operations, and from organic solvent cleaning, storage and disposal associated with can coating and coil coating operations.

District Rule 4604 as amended September 20, 2007 has been submitted to the EPA to replace District Rule 4604 as amended January 15, 2004, which is contained in the SIP, and District Rule 4604 as amended December 20, 2001, which is also currently listed as contained in the SIP. The current version of District Rule 4604 (9/20/07) is more stringent than the 1/15/04 and 12/20/01 versions.

The latest amended version of District Rule 4604 (1/15/04) contained in the SIP included the following changes compared to the previous version of District Rule 4604 (12/20/01) also listed as contained in the SIP:

- New definitions were added to the rule
- The quantity exemption contained in the rule was changed from 3 gallons per day (potential for up to 1,095 gallons used per year) to 55 gallons per rolling 12 month year effective on and after February 1, 2005.
- Rule requirements for cans were split into three tables concerning two piece can coatings, three-piece can coatings, and drum, pail and lid coatings.
- Lower VOC content limits were added to be effective February 1, 2006.

- A new coating category for Repair Coating was added at 750 grams per liter.
- Section 5.2 was added detailing the requirements for an approved VOC emission control system and requiring periodic source testing of the capture and control efficiency of VOC emission control systems.
- The provisions for Alternative Emission Control Plans were deleted.
- Section 5.5, Application Equipment was added to specify the use of high transfer efficiency equipment or emission control systems.
- Test methods for transfer efficiency and source testing were added.

Although the previous version of District Rule 4604 (12/20/01) is not listed as being removed from the SIP, in the Technical Support Document for EPA's Direct Final Rulemaking on the California SIP, EPA's Analysis of San Joaquin Valley Unified Air Pollution Control District's Rule 4604, Can and Coil Coating Operations (June 2004), EPA, Region IX found that the amendments to District Rule 4604 did not threaten Reasonable Further Progress (RFP) or attainment of the National Ambient Air Quality Standards and also found that the amendments "strengthen" the rule by adding more stringent coating requirements in 2006 and making it more enforceable. Additionally, the amendments were estimated to result in significant VOC emission reductions.¹

Because EPA has already determined that the January 15, 2004 amendments to District Rule 4604 contained in the SIP strengthened the rule in comparison to the version of District Rule 4604 as amended December 20, 2001 (and also contained in the SIP), only the requirements of the current version of Rule 4604 as amended September 20, 2007 and the SIP-approved version of the Rule 4604 as amended January 15, 2004 will be compared in the stringency analysis to ensure that the latest amendments do not result in less stringent requirements than those currently contained in the SIP.

The latest amended version of District Rule 4604 (9/20/07) included the following changes compared to the previous SIP-approved version of District Rule 4604 (1/15/04):

- No changes to Section 1.0, Purpose, or Section 2.0, Applicability.
- New definitions were added to Section 3.0 of the rule
- Section 4.0 was amended to remove reference to the outdated exemption for the use of 3 gallons per day or less of coatings; this outdated exemption was replaced with the more stringent exemption of usage of 55 gallons or less of coatings each 12-month period.

¹ A summary of EPA's evaluation of the amendments to SIP-approved District Rule 4604 as amended January 15, 2004 as compared to the SIP-approved version of District Rule 4604 as amended December 20, 2001 can be found on the EPA website at:
<http://yosemite.epa.gov/R9/r9sips.nsf/AgencyProvision/1F5B016C23F4796388257480005F68DB?OpenDocument>

- Obsolete composite vapor pressure limits were removed
- Compliance dates that have already passed, which required operators to begin using solvents and/or coatings with lower VOC contents, were removed from the Rule
- The requirements of Section 5.4 and Table 5 – “VOC Limits for Organic Solvents Used in Cleaning Operations” were amended as follows
 - Obsolete VOC Content and VOC Composite limits that were effective from November 15, 2003 through September 20, 2008 were removed
 - Requirement was added reducing the VOC content limits of solvents not used with VOC emission control equipment to 25 g/l (0.21 lb/gal) for all operations except “sheet coater for three-piece can” effective on and after September 21, 2008
 - Requirement was added reducing the VOC content limit of solvents not used with VOC emission control equipment from 550 g/l (4.6 lb/gal) to 250 g/l (2.3 lb/gal) for “sheet coater for three-piece can” effective on and after October 1, 2011
- Section 5.4.9 requiring operators to store and dispose of solvents and waste solvent cleaning materials in closed, non-absorbent, non-leaking containers was moved to Section 5.5 “Organic Solvent Storage and Disposal”
- Obsolete requirements for the determination of Vapor Pressure were removed from Section 6.7.

As summarized above, the latest amended version of District Rule 4604 (9/20/07) is nearly identical to the previous version of District Rule 4604 (1/15/04), the differences being the removal of requirements that had become obsolete from the rule and the more stringent requirements for the VOC content of solvents.

The deletion of obsolete requirements does not relax any applicable requirements, while reducing the VOC contents of cleaning solvents results in a more stringent rule. Therefore, District Rule 4604 as amended 9/20/07 is at least as stringent as the requirements of SIP-approved District Rule 4604 as amended 1/15/04. The detailed stringency analysis in Attachment D also demonstrates that the current version of Rule 4604 (9/20/07) is as stringent as the SIP-approved version of the Rule 4604 (1/15/04).

The following permit requirements were ensure compliance with this rule:

a. N-2253-0-3: Facility-Wide Requirements

- Condition 43 ensures compliance with this rule.

- b. N-2253-1-7: Side Seam Stripe Spray Operation (Line #1) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared 8.0 MMBtu/hr Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- c. N-2253-2-7: Side Seam Stripe Spray Operation (Line #2) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- d. N-2253-3-7: Side Seam Stripe Spray Operation (Line #3) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- e. N-2253-4-7: Side Seam Stripe Spray Operation (Line #4) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- f. N-2253-6-7: Side Seam Stripe Spray Operation (Line #6) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- g. N-2253-7-7: Side Seam Stripe Spray Operation (Line #7) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
 - Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.

- h. N-2253-8-7: Side Seam Stripe Spray Operation (Line #8) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
- Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- i. N-2253-9-7: Side Seam Stripe Spray Operation (Line #9) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
- Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- j. N-2253-15-8: Sheet Coating Operation #2 Consisting of a Sheet Coater and a Shared 8.6 MMBtu/hr Oven with Low NOx burners. The Coating Application Equipment and the Oven are All Vented to the Shared Thermal Oxidizer
- Conditions 4 through 9, 23 through 27, 30 through 31, and 34 ensure compliance with this rule.
- k. N-2253-16-8: Sheet Coating Operation #3 Consisting of a Sheet Coater and a Shared 8.6 MMBtu/hr Oven with Low NOx burners. The Coating Application Equipment and the Oven are All Vented to the Shared Thermal Oxidizer
- Conditions 4 through 9, 23 through 27, 30 through 31, and 34 ensure compliance with this rule.
- l. N-2253-17-8: Sheet Coating Operation #4 Consisting of a Sheet Coater and a Shared 8.6 MMBtu/hr Oven with Low NOx burners. The Coating Application Equipment and the Oven are All Vented to the Shared Thermal Oxidizer
- Conditions 4 through 9, 23 through 27, 30 through 31, and 34 ensure compliance with this rule.

- m. N-2253-18-8: UV Type Sheet Coating Operation #1 Consisting of a Sheet Coater. The Shared 8.6 MMBtu/hr Oven from Permit Units N-2253-15, N-2253-16, and N-2253-17 may serve products manufactured from this permit unit
- Conditions 2 through 5, 9 through 12, and 15 ensure compliance with this rule.
- n. N-2253-21-3: Side Seam Stripe Spray Operation (Line #10) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer
- Conditions 6 through 15, 25 through 26, 28, 30, 34 through 36, and 38 ensure compliance with this rule.
- o. N-2253-22-1: Side Seam Stripe Spray Operation (Line #5) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared 8.0 MMBtu/hr Thermal Oxidizer
- Conditions 6 through 15, 24 through 25, 27, 29, 33 through 35, and 37 ensure compliance with this rule.

G. District Rule 4623 - Storage of Organic Liquids

The purpose of this rule is to limit volatile organic compound (VOC) emissions from the storage of organic liquids. This rule was amended on May 19, 2005 to correct deficiencies cited by US EPA. EPA approved this amended version of the rule for inclusion in the SIP on September 13, 2005. A summary of the amendments to Rule 4623 is provided below.²

The definition of "Gas Tight" (Section 3.10) has been deleted from the rule. The term has been replaced by the more universal term "Leak-Free".

- This administrative change does not affect the requirements for the permit units at this facility since the tanks at the facility are only allowed to store organic liquid with a True Vapor Pressure (TVP) less than 0.5 psia and are exempt from this requirement pursuant to Section 4.4.

² A summary of EPA's evaluation of the amendments to SIP-approved District Rule 4623 as amended September 13, 2005 as compared to the previous SIP-approved version of District Rule 4623 can also be found on the EPA website at:
<http://yosemite.epa.gov/R9/r9sips.nsf/AgencyProvision/D1746E596CBA9C9A88256E30006EF001?OpenDocument>

The requirements of Section 4.4 and 6.2 were modified to clarify that operators of uncontrolled tanks storing and organic liquid with a TVP of less than 0.5 psia are required to initially and periodically test the TVP or API gravity of the stored liquid to demonstrate that the tank is exempt from the rule's prohibitory requirements.

- Conditions were added to the requirements for the tanks requiring the facility to conduct true vapor pressure (TVP) testing of the organic liquid stored in the tanks or representative tanks as allowed by Section 6.2 at least once every 24 months during the summer (July - September), and/or whenever there is a change in the source or type of organic liquid stored in the tanks.

Section 5.6.1 was revised to clarify that test methods specified in Section 6.4.6 only apply to emission control systems that reduce inlet emissions by 95% by weight; and not to closed-loop vapor recovery systems.

- This change does not affect the requirements for the permit units at this facility since the tanks at the facility are only allowed to store organic liquid with a True Vapor Pressure (TVP) less than 0.5 psia and are exempt from control system requirements pursuant to Section 4.4.

Section 5.7 was amended to require that voluntary preventative inspection and maintenance provisions for tanks are consistent with EPA policy and to incorporate VOC emission mitigation practices, recordkeeping, and notification requirements for use during routine tank inspection, maintenance, interior cleaning, and sludge removal activities.

- This change does not affect the requirements for the permit units at this facility since the tanks at the facility are only allowed to store organic liquid with a True Vapor Pressure (TVP) less than 0.5 psia and are exempt from the requirements of this section pursuant to Section 4.4.

Section 6.2.3 was amended to exempt small volume, low throughput, uncontrolled fixed-roof tanks permitted by the District to operate a pressure-vacuum relief valve, and exclusively receiving and/or storing crude oil with a TVP of less than 11.0 psia, from initial and periodic TVP testing requirements.

- The tanks at this facility do not store crude oil; therefore, this section is not applicable.

Section 6.4.6 was amended to allow tank operators to use EPA Method 18 instead of EPA Method 25 or 25A to determine VOC destruction efficiency under limited circumstances.

- This change does not affect the requirements for the permit units at this facility since the tanks at the facility are only allowed to store organic liquid with a True Vapor Pressure (TVP) less than 0.5 psia and are exempt from control system requirements pursuant to Section 4.4.

Section 7.1 of the rule was deleted because the compliance dates specified in Section 7.1 have passed and were no longer relevant.

- None of the permit unit conditions were affected by the above change.

The following permit requirements were added or revised to ensure compliance with this rule:

- a. N-2253-19-4: Coating Storage Tank #1 Consisting of One 8,000 Gallon Aboveground Vertical Fixed Roof Storage Tank
 - Conditions 3 through 10 ensure compliance with this rule.
- b. N-2253-20-4: Coating Storage Tank #2 Consisting of One 8,000 Gallon Aboveground Vertical Fixed Roof Storage Tank
 - Conditions 3 through 10 ensure compliance with this rule.

H. District Rule 8011 - General Requirements

The purpose of Regulation VIII (Fugitive PM₁₀ Prohibitions) is to reduce ambient concentrations of fine particulate matter (PM₁₀) by requiring actions to prevent, reduce or mitigate anthropogenic fugitive dust emissions. The Rules contained in this Regulation have been developed pursuant to United States Environmental Protection Agency guidance for Serious PM₁₀ Nonattainment Areas. The rules are applicable to specified anthropogenic fugitive dust sources. Fugitive dust contains PM₁₀ and particles larger than PM₁₀. Controlling fugitive dust missions when visible emissions are detected will not prevent all PM₁₀ emissions, but will substantially reduce PM₁₀ emissions.

The provisions of this rule are applicable to specified outdoor fugitive dust sources. The definitions, exemptions, requirements, administrative requirements, recordkeeping requirements, and test methods set forth in this rule are applicable to all Rules under Regulation VIII (Fugitive PM₁₀

Prohibitions) of the Rules and Regulations of the San Joaquin Valley Unified Air Pollution Control District.

- Conditions 29 through 35 of the facility-wide requirements N-2253-0-3 ensure compliance.

I. District Rule 8021 - Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities

The purpose of this rule is to limit fugitive dust emissions from construction, demolition, excavation, extraction, and other earthmoving activities.

This rule applies to any construction, demolition, excavation, extraction, and other earthmoving activities, including, but not limited to, land clearing, grubbing, scraping, travel on site, and travel on access roads to and from the site. This rule also applies to the construction of new landfill disposal sites or modification to existing landfill disposal sites prior to commencement of landfilling activities.

Section 5.0 requires that no person shall perform any construction, demolition, excavation, extraction, or other earthmoving activities unless the appropriate requirements in sections 5.1 and 5.2 are sufficiently implemented to limit Visible Dust Emissions (VDE) to 20% opacity or less. In addition to the requirements of this rule, a person shall comply with all other applicable requirements of Regulation VIII.

- Condition 29 of the facility-wide requirements N-2253-0-3 ensures compliance.

J. District Rule 8031 - Bulk Materials

The purpose of this rule is to limit fugitive dust emissions from the outdoor handling, storage, and transport of bulk materials.

This rule applies to the outdoor handling, storage, and transport of any bulk material.

Section 5.0 requires that no person shall perform any outdoor handling, storage, and transport of bulk materials unless the appropriate requirements in Table 8031-1 of this rule are sufficiently implemented to limit Visible Dust Emissions (VDE) to 20% opacity or less or to comply with the conditions for a stabilized surface as defined in Rule 8011. In addition to the requirements of this rule, a person shall comply with all other applicable requirements of Regulation VIII.

- Condition 30 of the facility-wide requirements N-2253-0-3 ensures compliance.

K. District Rule 8041 - Carryout and Trackout

The purpose of this rule is to limit fugitive dust emissions from carryout and trackout.

This rule applies to all sites that are subject to Rules 8021 (Construction, Demolition, Excavation, Extraction, and other Earthmoving Activities), 8031 (Bulk Materials), 8061 (Paved and Unpaved Roads), and 8071 (Unpaved Vehicle and Equipment Traffic Areas) where carryout or trackout has occurred or may occur.

Section 5.0 requires that the owner or operator shall sufficiently prevent or cleanup carryout and trackout as specified in sections 5.1 through 5.8. In addition to the requirements of this rule, a person shall comply with all other applicable requirements of Regulation VIII. The use of blower devices, or dry rotary brushes or brooms, for removal of carryout and trackout on public roads is expressly prohibited. The removal of carryout and trackout from paved public roads does not exempt an owner or operator from obtaining state or local agency permits which may be required for the cleanup of mud and dirt on paved public roads.

- Condition 31 of the facility-wide requirements N-2253-0-3 ensures compliance.

L. District Rule 8051 - Open Areas

The purpose of this rule is to limit fugitive dust emissions from open areas.

This rule applies to any open area having 0.5 acres or more within urban areas, or 3.0 acres or more within rural areas; and contains at least 1000 square feet of disturbed surface area.

Section 5.0 requires that whenever open areas are disturbed or vehicles are used in open areas, the owner or operator shall implement one or more of the control measures indicated in Table 8051-1 to comply with the conditions of a stabilized surface at all times and to limit Visible Dust Emissions (VDE) to 20% opacity. In addition to the requirements of this rule, a person shall comply with all other applicable requirements of Regulation VIII.

- Condition 32 of the facility-wide requirements N-2253-0-3 ensures compliance.

M. District Rule 8061 - Paved and Unpaved Roads

The purpose of this rule is to limit fugitive dust emissions from paved and unpaved roads by implementing control measures and design criteria.

This rule applies to any new or existing public or private paved or unpaved road, road construction project, or road modification project.

- Condition 33 of the facility-wide requirements N-2253-0-3 ensures compliance.

N. District Rule 8071 - Unpaved Vehicle/Equipment Traffic Area

The purpose of this rule is to limit fugitive dust emissions from unpaved vehicle and equipment traffic areas by implementing control measures and design criteria.

This rule applies to any unpaved vehicle/equipment traffic area that is not an agricultural source.

- Conditions 34 through 35 of the facility-wide requirements N-2253-0-3 ensure compliance.

O. 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos

These regulations apply to demolition or renovation activity, as defined in 40 CFR 61.141. 40 CFR Section 61.150 of this Subpart was amended September 18, 2003, and condition 36 of the facility-wide requirements N-2253-0-3 ensures compliance.

P. 40 CFR Part 64-CAM

40 CFR Part 64 requires Compliance Assurance Monitoring (CAM) for units that meet the following three criteria:

- 1) the unit must have an emission limit for the pollutant;
- 2) the unit must have add-on controls for the pollutant; these are devices such as flue gas recirculation (FGR), baghouses, and catalytic oxidizers; and
- 3) the unit must have a pre-control potential to emit of greater than the major source thresholds.

40 CFR Part 64 requirements for the units at this facility were addressed in the evaluation for the initial Title V Operating Permit for this facility and the applicable requirements were incorporated into the initial Title V Operating Permit, which was issued on November 30, 2003. The requirements of 40 CFR Part 64 have not been amended since issuance of the initial Title V Operating permit for this facility; Therefore, CAM will only be evaluated for the units that were added after issuance of the initial Title V permit for the facility:

- a. N-2253-21-3: Side Seam Stripe Spray Operation (Line #10) served by a 0.6 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared Thermal Oxidizer

This unit is vented to a shared thermal oxidizer and is subject to CAM for VOC emissions. CAM requirements for this unit are addressed by continuously monitoring the combustion temperature of the thermal oxidizer to ensure that a minimum combustion chamber of 1,490 °F is maintained; keeping records of the date, time period, and reason that the thermal oxidizer is out of service; and recording the VOC content of all coatings and solvents used. These are the same requirements satisfied CAM for the units that were evaluated for issuance of the initial Title V Operating Permit for this facility. These CAM requirements were incorporated into the requirements for this unit under Significant Modification Project N-1053242.

- Conditions 6 and 35 through 36 ensure compliance with CAM requirements

- b. N-2253-22-1: Side Seam Stripe Spray Operation (Line #5) served by a 0.4 MMBtu/hr Curing Tunnel and a Fume Hood Vented to a Shared 8.0 MMBtu/hr Thermal Oxidizer

This unit is vented to a shared thermal oxidizer and is subject to CAM for VOC emissions. CAM requirements for this unit are addressed by continuously monitoring the combustion temperature of the thermal oxidizer to ensure that a minimum combustion chamber of 1,490 °F is maintained; keeping records of the date, time period, and reason that the thermal oxidizer is out of service; and recording the VOC content of all coatings and solvents used. These are the same requirements satisfied CAM for the units that were evaluated for issuance of the initial Title V Operating Permit for this facility.

- Conditions 6 and 34 through 35 ensure compliance with CAM requirements

Q. 40 CFR Part 68, Chemical Action Prevention Provisions

This part sets forth the list of regulated substances and thresholds and specifies the requirements for owners or operators of stationary sources concerning the prevention of accidental releases, and the State accidental release prevention programs. The owner or operator of a stationary source subject to this part is required to submit a Risk Management Plan (RMP) that includes a registration that reflects all covered processes. Sections of this regulation were amended on April 9, 2004. Condition 42 of the facility-wide requirements N-2253-0-3 ensures compliance.

R. 40 CFR Part 82, Subparts B and F, Stratospheric Ozone

These regulations apply to servicing motor vehicles when this service involves the ozone-depleting refrigerant in the motor vehicle air conditioner (MVAC). Sections of this regulation were amended in 2004 and 2008. Conditions 27 through 28 of the facility-wide requirements N-2253-0-3 ensure compliance.

IX. PERMIT SHIELD

A permit shield legally protects a facility from enforcement of the shielded regulations when a source is in compliance with the terms and conditions of the Title V permit. Compliance with the terms and conditions of the Operating Permit is considered compliance with all applicable requirements upon which those conditions are based, including those that have been subsumed.

A. Requirements Addressed by Model General Permit Templates

1. Model General Permit Template SJV-UM-0-1

By submitting Model General Permit Template SJV-UM-0-1 qualification form, the applicant has requested that a permit shield be granted for all the applicable requirements identified by the template. Therefore, the permit shields as granted in Model General Permit Template are included as conditions 40 and 41 of the facility-wide requirements (N-2253-0-3).

B. Obsolete Permit Shields From Existing Permit Requirements

Obsolete permit shields for existing permit units have been removed because the referenced rules have been superseded by the adoption of newer rules or amendments to existing rules and/or the referenced rules

have been removed from the SIP. The existing permit shield was granted under a previous version of a rule, and that permit shield is no longer valid and must be removed from the permit requirements.

a. N-2253-0-2: Facility-Wide Requirements

Condition 39 of the PTO granted a permit shield from Stanislaus County Rule 401 and Stanislaus County Rule 202. Because these rules are not applicable requirements included in the SIP, the permit shields are invalid and have been removed.

Condition 40 of the PTO granted a permit shield from District Rule 2040 as amended 12/17/1992. Because this rule is not an applicable requirements included in the SIP, the permit shield is invalid and has been removed.

Permit to Operate

FACILITY: N-2253

EXPIRATION DATE: 10/31/2015

LEGAL OWNER OR OPERATOR:

BALL METAL FOOD CONTAINER CORP.

MAILING ADDRESS:

P O BOX 589
BROOMFIELD, CO 80038-0589

FACILITY LOCATION:

300 W GREGER ST
OAKDALE, CA 95361-8613

FACILITY DESCRIPTION:

CAN & COIL MANUFACTURING

The Facility's Permit to Operate may include Facility-wide Requirements as well as requirements that apply to specific permit units.

This Permit to Operate remains valid through the permit expiration date listed above, subject to payment of annual permit fees and compliance with permit conditions and all applicable local, state, and federal regulations. This permit is valid only at the location specified above, and becomes void upon any transfer of ownership or location. Any modification of the equipment or operation, as defined in District Rule 2201, will require prior District approval. This permit shall be posted as prescribed in District Rule 2010.

Seyed Sadredin
Executive Director / APCO

David Warner
Director of Permit Services

San Joaquin Valley Air Pollution Control District

FACILITY: N-2253-0-3

EXPIRATION DATE: 10/31/2015

FACILITY-WIDE REQUIREMENTS

1. The owner or operator shall notify the District of any breakdown condition as soon as reasonably possible, but no later than one hour after its detection, unless the owner or operator demonstrates to the District's satisfaction that the longer reporting period was necessary. [District Rule 1100, 6.1; Stanislaus County Rule 110] Federally Enforceable Through Title V Permit
2. The District shall be notified in writing within ten days following the correction of any breakdown condition. The breakdown notification shall include a description of the equipment malfunction or failure, the date and cause of the initial failure, the estimated emissions in excess of those allowed, and the methods utilized to restore normal operations. [District Rule 1100, 7.0; Stanislaus County Rule 110] Federally Enforceable Through Title V Permit
3. The owner or operator of any stationary source operation that emits more than 25 tons per year of nitrogen oxides or reactive organic compounds, shall provide the District annually with a written statement in such form and at such time as the District prescribes, showing actual emissions of nitrogen oxides and reactive organic compounds from that source. [District Rule 1160, 5.0] Federally Enforceable Through Title V Permit
4. Any person building, altering or replacing any operation, article, machine, equipment, or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate, reduce, or control the issuance of air contaminants, shall first obtain an Authority to Construct (ATC) from the District unless exempted by District Rule 2020 (12/20/07). [District Rule 2010, 3.0 and 4.0; and 2020] Federally Enforceable Through Title V Permit
5. The permittee must comply with all conditions of the permit including permit revisions originated by the District. All terms and conditions of a permit that are required pursuant to the Clean Air Act (CAA), including provisions to limit potential to emit, are enforceable by the EPA and Citizens under the CAA. Any permit noncompliance constitutes a violation of the CAA and the District Rules and Regulations, and is grounds for enforcement action, for permit termination, revocation, reopening and reissuance, or modification; or for denial of a permit renewal application. [District Rules 2070, 7.0; 2080; and 2520, 9.9.1 and 9.13.1] Federally Enforceable Through Title V Permit
6. A Permit to Operate or an Authority to Construct shall not be transferred unless a new application is filed with and approved by the District. [District Rule 2031] Federally Enforceable Through Title V Permit
7. Every application for a permit required under Rule 2010 (12/17/92) shall be filed in a manner and form prescribed by the District. [District Rule 2040]
8. The operator shall maintain records of required monitoring that include: 1) the date, place, and time of sampling or measurement; 2) the date(s) analyses were performed; 3) the company or entity that performed the analysis; 4) the analytical techniques or methods used; 5) the results of such analysis; and 6) the operating conditions at the time of sampling or measurement. [District Rule 2520, 9.4.1] Federally Enforceable Through Title V Permit
9. The operator shall retain records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, or report. Support information includes copies of all reports required by the permit and, for continuous monitoring instrumentation, all calibration and maintenance records and all original strip-chart recordings or electronic data. [District Rule 2520, 9.4.2] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate. Any amendments to these Facility-wide Requirements that affect specific Permit Units may constitute modification of those Permit Units.

Facility Name: BALL METAL FOOD CONTAINER CORP.
Location: 300 W GREGER ST, OAKDALE, CA 95361-8613
N-2253-0-3 : Jan 18 2011 9:18AM -- NORMANR

10. The operator shall submit reports of any required monitoring at least every six months unless a different frequency is required by an applicable requirement. All instances of deviations from permit requirements must be clearly identified in such reports. [District Rule 2520, 9.5.1] Federally Enforceable Through Title V Permit
11. Deviations from permit conditions must be promptly reported, including deviations attributable to upset conditions, as defined in the permit. For the purpose of this condition, promptly means as soon as reasonably possible, but no later than 10 days after detection. The report shall include the probable cause of such deviations, and any corrective actions or preventive measures taken. All required reports must be certified by a responsible official consistent with section 10.0 of District Rule 2520 (6/21/01). [District Rules 2520, 9.5.2 and 1100, 7.0] Federally Enforceable Through Title V Permit
12. If for any reason a permit requirement or condition is being challenged for its constitutionality or validity by a court of competent jurisdiction, the outcome of such challenge shall not affect or invalidate the remainder of the conditions or requirements in that permit. [District Rule 2520, 9.7] Federally Enforceable Through Title V Permit
13. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit. [District Rule 2520, 9.8.2] Federally Enforceable Through Title V Permit
14. The permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition. [District Rule 2520, 9.8.3] Federally Enforceable Through Title V Permit
15. The permit does not convey any property rights of any sort, or any exclusive privilege. [District Rule 2520, 9.8.4] Federally Enforceable Through Title V Permit
16. The Permittee shall furnish to the District, within a reasonable time, any information that the District may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the District copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to EPA along with a claim of confidentiality. [District Rule 2520, 9.8.5] Federally Enforceable Through Title V Permit
17. The permittee shall pay annual permit fees and other applicable fees as prescribed in Regulation III of the District Rules and Regulations. [District Rule 2520, 9.9] Federally Enforceable Through Title V Permit
18. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to enter the permittee's premises where a permitted source is located or emissions related activity is conducted, or where records must be kept under condition of the permit. [District Rule 2520, 9.13.2.1] Federally Enforceable Through Title V Permit
19. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit. [District Rule 2520, 9.13.2.2] Federally Enforceable Through Title V Permit
20. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to inspect at reasonable times any facilities, equipment, practices, or operations regulated or required under the permit. [District Rule 2520, 9.13.2.3] Federally Enforceable Through Title V Permit
21. Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or applicable requirements. [District Rule 2520, 9.13.2.4] Federally Enforceable Through Title V Permit
22. No air contaminants shall be discharged into the atmosphere for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker than Ringelmann #1 or equivalent to 20% opacity and greater, unless specifically exempted by District Rule 4101 (2/17/05). If the equipment or operation is subject to a more stringent visible emission standard as prescribed in a permit condition, the more stringent visible emission limit shall supersede this condition. [District Rule 4101] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

23. No person shall manufacture, blend, or repackage for use within the District; or supply, sell, or offer for sale within the District; or solicit for application or apply within the District any architectural coating with a VOC content in excess of the corresponding limit specified in the Table of Standards 1 of District Rule 4601 (12/17/09) or the Table of Standards 2 of District Rule 4601, after the specified effective date in the Table of Standards 1 or the Table of Standards 2. [District Rule 4601, 5.1] Federally Enforceable Through Title V Permit
24. All VOC-containing materials subject to Rule 4601 (12/17/09) shall be stored in closed containers when not in use. [District Rule 4601, 5.4] Federally Enforceable Through Title V Permit
25. The permittee shall comply with all the Labeling and Test Methods requirements outlined in Rule 4601 sections 6.1 and 6.3 (12/17/09). [District Rule 4601, 6.1 and 6.3] Federally Enforceable Through Title V Permit
26. With each report or document submitted under a permit requirement or a request for information by the District or EPA, the permittee shall include a certification of truth, accuracy, and completeness by a responsible official. [District Rule 2520, 9.13.1 and 10.0] Federally Enforceable Through Title V Permit
27. If the permittee performs maintenance on, or services, repairs, or disposes of appliances, the permittee shall comply with the standards for Recycling and Emissions Reduction pursuant to 40 CFR Part 82, Subpart F. [40 CFR 82 Subpart F] Federally Enforceable Through Title V Permit
28. If the permittee performs service on motor vehicles when this service involves the ozone-depleting refrigerant in the motor vehicle air conditioner (MVAC), the permittee shall comply with the standards for Servicing of Motor Vehicle Air Conditioners pursuant to all the applicable requirements as specified in 40 CFR Part 82, Subpart B. [40 CFR Part 82, Subpart B] Federally Enforceable Through Title V Permit
29. Disturbances of soil related to any construction, demolition, excavation, extraction, or other earthmoving activities shall comply with the requirements for fugitive dust control in District Rule 8021 unless specifically exempted under Section 4.0 of Rule 8021 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8021 and 8011] Federally Enforceable Through Title V Permit
30. Unless specifically exempted under Section 4.0 of Rule 8031 (8/19/04) or Rule 8011 (8/19/04), no person shall perform any outdoor handling, storage, and transport of bulk materials unless the appropriate requirements in Table 8031-1 of Rule 8031 are sufficiently implemented to limit Visible Dust Emissions (VDE) to 20% opacity or to comply with the conditions for a stabilized surface as defined in Rule 8011. [District Rules 8031 and 8011] Federally Enforceable Through Title V Permit
31. An owner/operator shall prevent or cleanup any carryout or trackout in accordance with the requirements of District Rule 8041 Section 5.0, unless specifically exempted under Section 4.0 of Rule 8041 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8041 and 8011] Federally Enforceable Through Title V Permit
32. Whenever open areas are disturbed, or vehicles are used in open areas, the facility shall comply with the requirements of Section 5.0 of District Rule 8051, unless specifically exempted under Section 4.0 of Rule 8051 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8051 and 8011] Federally Enforceable Through Title V Permit
33. Any paved road or unpaved road shall comply with the requirements of District Rule 8061 unless specifically exempted under Section 4.0 of Rule 8061 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8061 and Rule 8011] Federally Enforceable Through Title V Permit
34. Any unpaved vehicle/equipment area that anticipates more than 50 Average annual daily Trips (AADT) shall comply with the requirements of Section 5.1.1 of District Rule 8071. Any unpaved vehicle/equipment area that anticipates more than 150 vehicle trips per day (VDT) shall comply with the requirements of Section 5.1.2 of District Rule 8071. On each day that 25 or more VDT with 3 or more axles will occur on an unpaved vehicle/equipment traffic area, the owner/operator shall comply with the requirements of Section 5.1.3 of District Rule 8071. On each day when a special event will result in 1,000 or more vehicles that will travel/park on an unpaved area, the owner/operator shall comply with the requirements of Section 5.1.4 of District Rule 8071. All sources shall comply with the requirements of Section 5.0 of District Rule 8071 unless specifically exempted under Section 4.0 of Rule 8071 (9/16/2004) or Rule 8011 (8/19/2004). [District Rule 8071 and Rule 8011] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. On each day that 50 or more vehicle daily trips, or 25 or more vehicle daily trips with 3 or more axles, originates from within and remains exclusively within an unpaved vehicle/equipment traffic area, the owner/operator may apply/reapply water to limit VDE to 20% opacity. The owner/operator shall restrict access and periodically stabilize a disturbed surface area whenever a site becomes inactive to comply with the conditions for a stabilized surface as defined in Rule 8011, unless specifically exempted under Section 4.0 of Rule 8071 (9/16/04) or Rule 8011 (8/19/04). [District Rules 8071 and Rule 8011] Federally Enforceable Through Title V Permit
36. Any owner or operator of a demolition or renovation activity, as defined in 40 CFR 61.141, shall comply with the applicable inspection, notification, removal, and disposal procedures for asbestos containing materials as specified in 40 CFR 61.145 (Standard for Demolition and Renovation). [40 CFR 61 Subpart M] Federally Enforceable Through Title V Permit
37. The permittee shall submit certifications of compliance with the terms and standards contained in Title V permits, including emission limits, standards and work practices, to the District and the EPA annually (or more frequently as specified in an applicable requirement or as specified by the District). The certification shall include the identification of each permit term or condition, the compliance status, whether compliance was continuous or intermittent, the methods used for determining the compliance status, and any other facts required by the District to determine the compliance status of the source. [District Rule 2520, 9.16] Federally Enforceable Through Title V Permit
38. The permittee shall submit an application for Title V permit renewal to the District at least six months, but not greater than 18 months, prior to the permit expiration date. [District Rule 2520, 5.2] Federally Enforceable Through Title V Permit
39. When a term is not defined in a Title V permit condition, the definition in the rule cited as the origin and authority for the condition in a Title V permits shall apply. [District Rule 2520, 9.1.1] Federally Enforceable Through Title V Permit
40. Compliance with permit conditions in the Title V permit shall be deemed in compliance with the following outdated SIP requirements: Rule 110 (Stanislaus). A permit shield is granted from these requirements. [District Rule 2520, 13.2] Federally Enforceable Through Title V Permit
41. Compliance with permit conditions in the Title V permit shall be deemed in compliance with the following applicable requirements: SJVUAPCD Rules 1100, sections 6.1 and 7.0 (12/17/92); 2010, sections 3.0 and 4.0 (12/17/92); 2031 (12/17/92); 2070, section 7.0 (12/17/92); 2080 (12/17/92); 4101 (2/17/05); 4601, sections 5.1, 5.2, 5.3, and 5.8 (12/17/09); 8021 (8/19/04); 8031 (8/19/04); 8041 (8/19/04); 8051 (8/19/04); 8061 (8/19/04); and 8071 (9/16/04). A permit shield is granted from these requirements. [District Rule 2520, 13.2] Federally Enforceable Through Title V Permit
42. When applicable to 40 CFR Part 68, a subject facility shall submit to the proper authority a Risk Management Plan when mandated by the regulation. [40 CFR Part 68] Federally Enforceable Through Title V Permit
43. Any person that operates a VOC emission control system subject to the provisions of Section 5.2 of District Rule 4604 (9/20/07) shall submit to the APCO for approval an Operation and Maintenance (O/M) plan. The O/M Plan shall specify actions to be taken to satisfy the requirements of District Rule 4604, Section 5.2 and shall include the following: values or range of acceptable values for key system operating parameter(s); procedures for preventive and corrective maintenance performed; procedures for collecting and recording required data and other information in a form approved by the APCO; burner maintenance schedule; catalyst maintenance and maintenance schedule, if applicable; duct inspection schedule; procedures for revising the O/M Plan; and other information necessary to verify compliance with applicable provisions of Rule 4604. The O/M Plan shall be updated prior to any planned change in operation of the VOC emission control system. [District Rule 4604, 5.2.7 and 6.5] Federally Enforceable Through Title V Permit
44. Stationary source (as defined in 40 CFR 63.2 - Definitions) emissions shall be less than 10 tons per year of each single hazardous air pollutant (HAP) (as defined in 40 CFR 63.2 - Definitions) and less than 25 tons per year for any combination of HAPs. A year, for this condition, is any consecutive 12 month period based on a monthly rolling total. [District NSR Rule] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

45. The owner/operator shall calculate and maintain records on a monthly basis of the quantity of each HAP emitted into the atmosphere from all sources at the facility. The HAP emissions shall be totaled for a rolling consecutive 12-month period. The records shall include an analysis (or other information) sufficiently detailed to allow the District Personal to make a finding about the source's applicability status with regard to the relevant standard or other requirement. [District NSR Rule and District Rule 2520 9.3.2] Federally Enforceable Through Title V Permit
46. The Permittee shall submit a semi annual summary report of HAP emissions report District. This report shall submitted along with semi-annual monitoring report. The report shall contain the following: (i). the monthly individual HAP and total HAP emissions for the previous 17 months and (ii). the totals for the six 12-consecutive month periods of individual HAP and total HAP emissions (i.e., one for each of the months of the reporting period). [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
47. The reporting periods for the Report of Required Monitoring and the Compliance Certification Report are based upon December 1 of each year, unless alternative dates are approved by the District Compliance Division. These reports are due within 30 days of the end of the reporting period. [District Rule 2520, 9.5] Federally Enforceable Through Title V Permit
48. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-1-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #1) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.6 MMBTU/HR FLYNN AERO FLAME AF-9 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED 8.0 MMBTU/HR SMITH THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

24. The PM10 emission concentration from the thermal oxidizer shall not exceed 0.0076 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
25. VOC content of coating(s), as applied, and of solvents shall be determined by United States Environmental Protection Agency (EPA) Test Method 24 or 24A, or South Coast Air Quality Management District (SCAQMD) Method 304 (Determination of Volatile Organic Compounds in Various Materials) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.1] Federally Enforceable Through Title V Permit
26. The content of exempt halogenated VOCs shall be determined by using the California Air Resources Board (ARB) Test Method 432 or SCAQMD Test Method 303 (Determination of Exempt Compounds) on an annual basis, or by using the manufacturer's product formulation data and the formula for "Grams of VOC per liter of Material" as allowed in District Rule 4604, Section 3.0 (9/20/07). If the coating/solvent manufacturers provide certification that the previously mentioned methods are used to determine the VOC content, copies of the coating/solvent product data sheets and the certifications may be maintained, used to calculate the VOC content of the coating, as applied, and shall be considered compliance with this condition. [District Rules 2520, 9.3.2 and 4604, 6.7.1.2] Federally Enforceable Through Title V Permit
27. The operator shall source test each collection device to determine the capture efficiency at least once five years. [District Rule 2520, 9.3.2] Federally Enforceable Through Title V Permit
28. The capture efficiency of VOC emission collection devices shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR 51, Appendix M, Methods 204-204F, as applicable, or any other method approved by EPA, ARB, and the APCO. [District Rules 2520, 9.3.2 and 4604, 6.7.2.1] Federally Enforceable Through Title V Permit
29. The operator shall source test the thermal oxidizer at least once every twelve (12) months to demonstrate compliance with the VOC control efficiency requirements. [District Rule 2201] Federally Enforceable Through Title V Permit
30. The control efficiency of VOC emission control device(s) shall be determined using EPA Methods 2, 2A, or 2D for measuring flow rates and EPA Methods 25, 25A, or 25B for measuring total gaseous organic concentrations at the inlet and outlet of the control device. EPA Method 18 or ARB Method 422 shall be used to determine the emissions of exempt compounds. [District Rule 4604, 6.7.2.2] Federally Enforceable Through Title V Permit
31. Source testing of the capture efficiency and control efficiency of VOC emission collection and control devices shall be performed under conditions representative of normal operating conditions and under conditions specified in the Permit-To-Operate. [District Rules 1081 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
32. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified 30 days prior to any compliance source test, and a source test plan must be submitted for approval 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit
33. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit
34. A list of the coatings, catalysts and reducers used, the mix ratio of the components used, the VOC content of each coating used (as applied) and of the VOC content of each solvent used for clean-up and surface preparation shall be kept. The list shall be made available to the District upon request. [District Rules 2520, 9.3.2 and 4604, 6.1, 6.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

35. Daily records of the following shall be kept: (a) The specific coatings used and the mix ratio of the components added to the coatings prior to application; (b) The volume of each coating used in gallons; (c) The specific solvent used for clean-up and surface preparation; (d) The volume of each solvent used; (e) The VOC emissions due to coating and solvent usage from this permit unit; (f). The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21 and N-2253-22; (g). The operating temperature of the thermal oxidizer. [District Rules 1070, 2520, 9.3.2 and 4604, 6.1, 6.2 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
36. Records of the date, the time period and the reason that the thermal oxidizer is out of service shall be kept. [District NSR Rule, Rules 2520, 9.3.2, 4604, 5.2.2, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
37. Records of the combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall be kept for any consecutive 12-month period. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
38. All records shall be retained for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 4604, 6.2, 6.3, and 6.4] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2253-2-7

EXPIRATION DATE: 10/31/2015

EQUIPMENT DESCRIPTION:

SIDE SEAM STRIPE SPRAY OPERATION (LINE #2) SERVED BY ONE SOUDRONIC MODEL FBB BODYMAKER AND ONE 0.6 MMBTU/HR FLYNN AERO FLAME AF-9 CURING TUNNEL. THE FUME HOOD (OVER THE COATING APPLICATOR AND CONVEYOR) AND CURING TUNNEL IS VENTED TO THE SHARED THERMAL OXIDIZER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. The VOC contaminated air stream from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall be vented to the thermal oxidizer at all times except when the thermal oxidizer is undergoing maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit
4. The collection system for fugitive VOC emissions from the side seam stripe coater, conveyor between the coater and curing tunnel, and curing tunnel shall have a minimum overall capture efficiency of 71%. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The thermal oxidizer shall be maintained at a minimum temperature of 1,490 Degrees F to provide at least 98.5% VOC control. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The thermal oxidizer shall be equipped with a continuous temperature monitoring and recording device. [District NSR Rule, Rules 2520, 9.3.2, 4604, 6.3 and 40 CFR Part 64] Federally Enforceable Through Title V Permit
7. The overall VOC capture and control efficiency shall be calculated by multiplying the percent VOC capture efficiency of the collection system by the percent VOC control efficiency of the thermal oxidizer and divide by 100. [District NSR Rule and Rule 4604, 6.7.2.3] Federally Enforceable Through Title V Permit
8. Three-piece can side seam spray operations shall not use or apply any coating with a VOC content in excess of 660 grams of VOC per liter of coating, as applied, excluding water and exempt compounds. [District Rule 4604, 5.1] Federally Enforceable Through Title V Permit
9. All solvent cleaning activities shall be performed using solvents with VOC contents not exceeding any of the following limits unless such cleaning operations are performed within the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07): product cleaning during manufacturing process or surface preparation for coating application: 25 g/l (0.21 lb/gal), repair and maintenance cleaning: 25 g/l (0.21 lb/gal), cleaning of coating application equipment except sheet coater for three-piece cans: 25 g/l (0.21 lb/gal), cleaning of sheet coater for three-piece cans: 550 g/l (4.6 lb/gal) until 9/30/2011 and 250 g/l (2.3 lb/gal) on and after 10/1/2011. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.

10. For cleaning of coating application equipment used for sheet coating of three-piece cans, cleaning activities that are performed outside the control of an APCO-approved emission control system that meets the requirements of District Rule 4604 (9/20/07) using solvents with a VOC content greater than 25 g/l (0.21 lb/gallon) shall be performed by one or more of the following methods: 1) wipe cleaning; 2) application of solvent from hand-held spray bottles from which solvents are dispensed without a propellant-induced force; 3) non-atomized solvent flow method in which the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container; or 4) solvent flushing method in which the cleaning solvent is discharged into a container that is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping. [District Rule 4604, 5.4] Federally Enforceable Through Title V Permit
11. Solvent shall not be atomized into the open air. This provision shall not apply to the cleaning of nozzle tips of automated spray equipment systems, except for robotic systems, and cleaning with spray bottles or containers described in section 5.4.4.2 of Rule 4604 (9/20/07). [District Rule 4604, 5.4.5] Federally Enforceable Through Title V Permit
12. Permittee shall not use VOC-containing materials to clean spray equipment used for the application of coatings unless an enclosed system or equipment proven to be equally effective in controlling emissions is used for cleaning. [District Rule 4604, 5.4.6] Federally Enforceable Through Title V Permit
13. An operator shall store or dispose of fresh or spent solvents, waste solvent cleaning materials such as cloth, paper, etc; coatings; adhesives; catalysts; and thinners in closed, non-absorbent and non-leaking containers. The containers shall remain closed at all times except when depositing or removing the contents of the containers or when the container is empty. [District Rule 4604, 5.5] Federally Enforceable Through Title V Permit
14. Only electrostatic, flow, roll, dip, hand application, HVLP, or other application methods with a coating transfer efficiency of at least 65% shall be used. All application equipment shall be operated in accordance with the manufacturer's recommendations. [District Rule 4604, 5.6.2]
15. Coating transfer efficiency shall be measured using a test method pursuant to Section 6.7.4 of Rule 4604 (9/20/07). [District Rule 4604, 5.6.2.7] Federally Enforceable Through Title V Permit
16. The VOC emissions due to coating and solvent usage (from this permit unit) shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
17. The PM10 emissions due to coating and solvent usage (from this permit unit) shall not exceed 0.4 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
18. The combined daily VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, and N-2253-21 shall not exceed 250 pounds during any one day. [District Rule 2201] Federally Enforceable Through Title V Permit
19. The combined VOC emissions from the equipment operating under permits N-2253-1, N-2253-2, N-2253-3, N-2253-4, N-2253-6, N-2253-7, N-2253-8, N-2253-9, N-2253-21, and N-2253-22 shall not exceed 58,579 pounds during any consecutive 12-month period. [District Rule 2201] Federally Enforceable Through Title V Permit
20. The NOx emission concentration from the thermal oxidizer shall not exceed 0.098 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
21. The CO emission concentration from the thermal oxidizer shall not exceed 0.082 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
22. The VOC emission concentration from the thermal oxidizer shall not exceed 0.005 lb/MMBtu of natural gas consumption. [District NSR Rule] Federally Enforceable Through Title V Permit
23. The SOx emission concentration from the thermal oxidizer shall not exceed 0.00285 lb/MMBtu of natural gas consumption. [District NSR Rule and Rule 4801, 3.1]
